

## States by Acres of National Parks and Forests

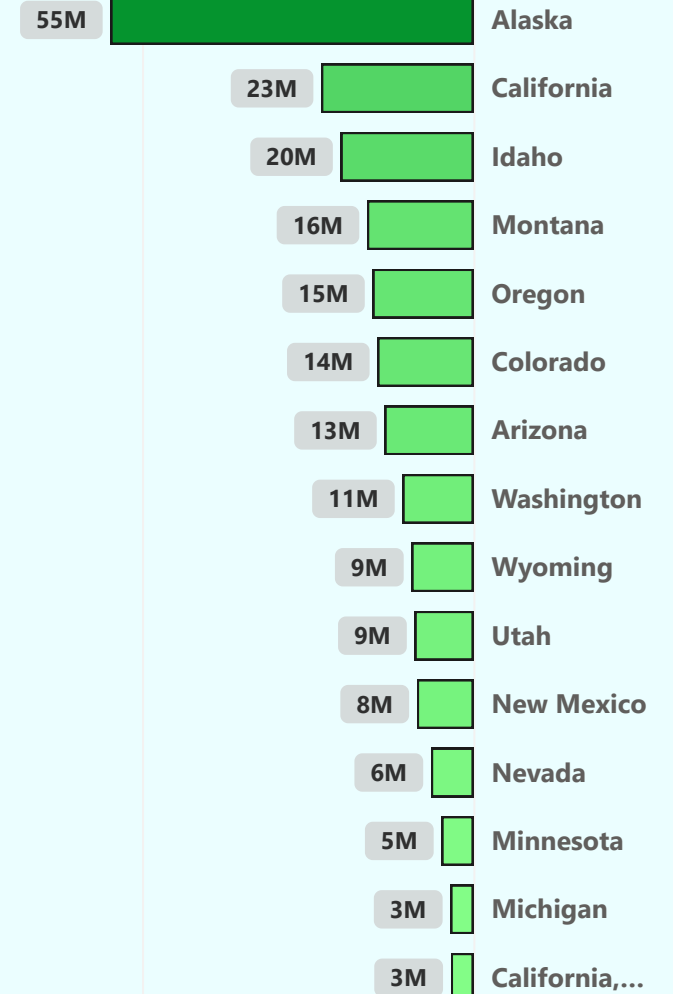

*Not ALL forest, but national forests. Excludes huge wildernesses like the Adirondacks*

Not able to capture this in the PDF, but there is a "report tooltip" tied to this, where data on the largest national parks pops up when you over over the map in Power BI

## States With Most Acres National Forests / Parks

Acres 3.37M 54.74M

50M

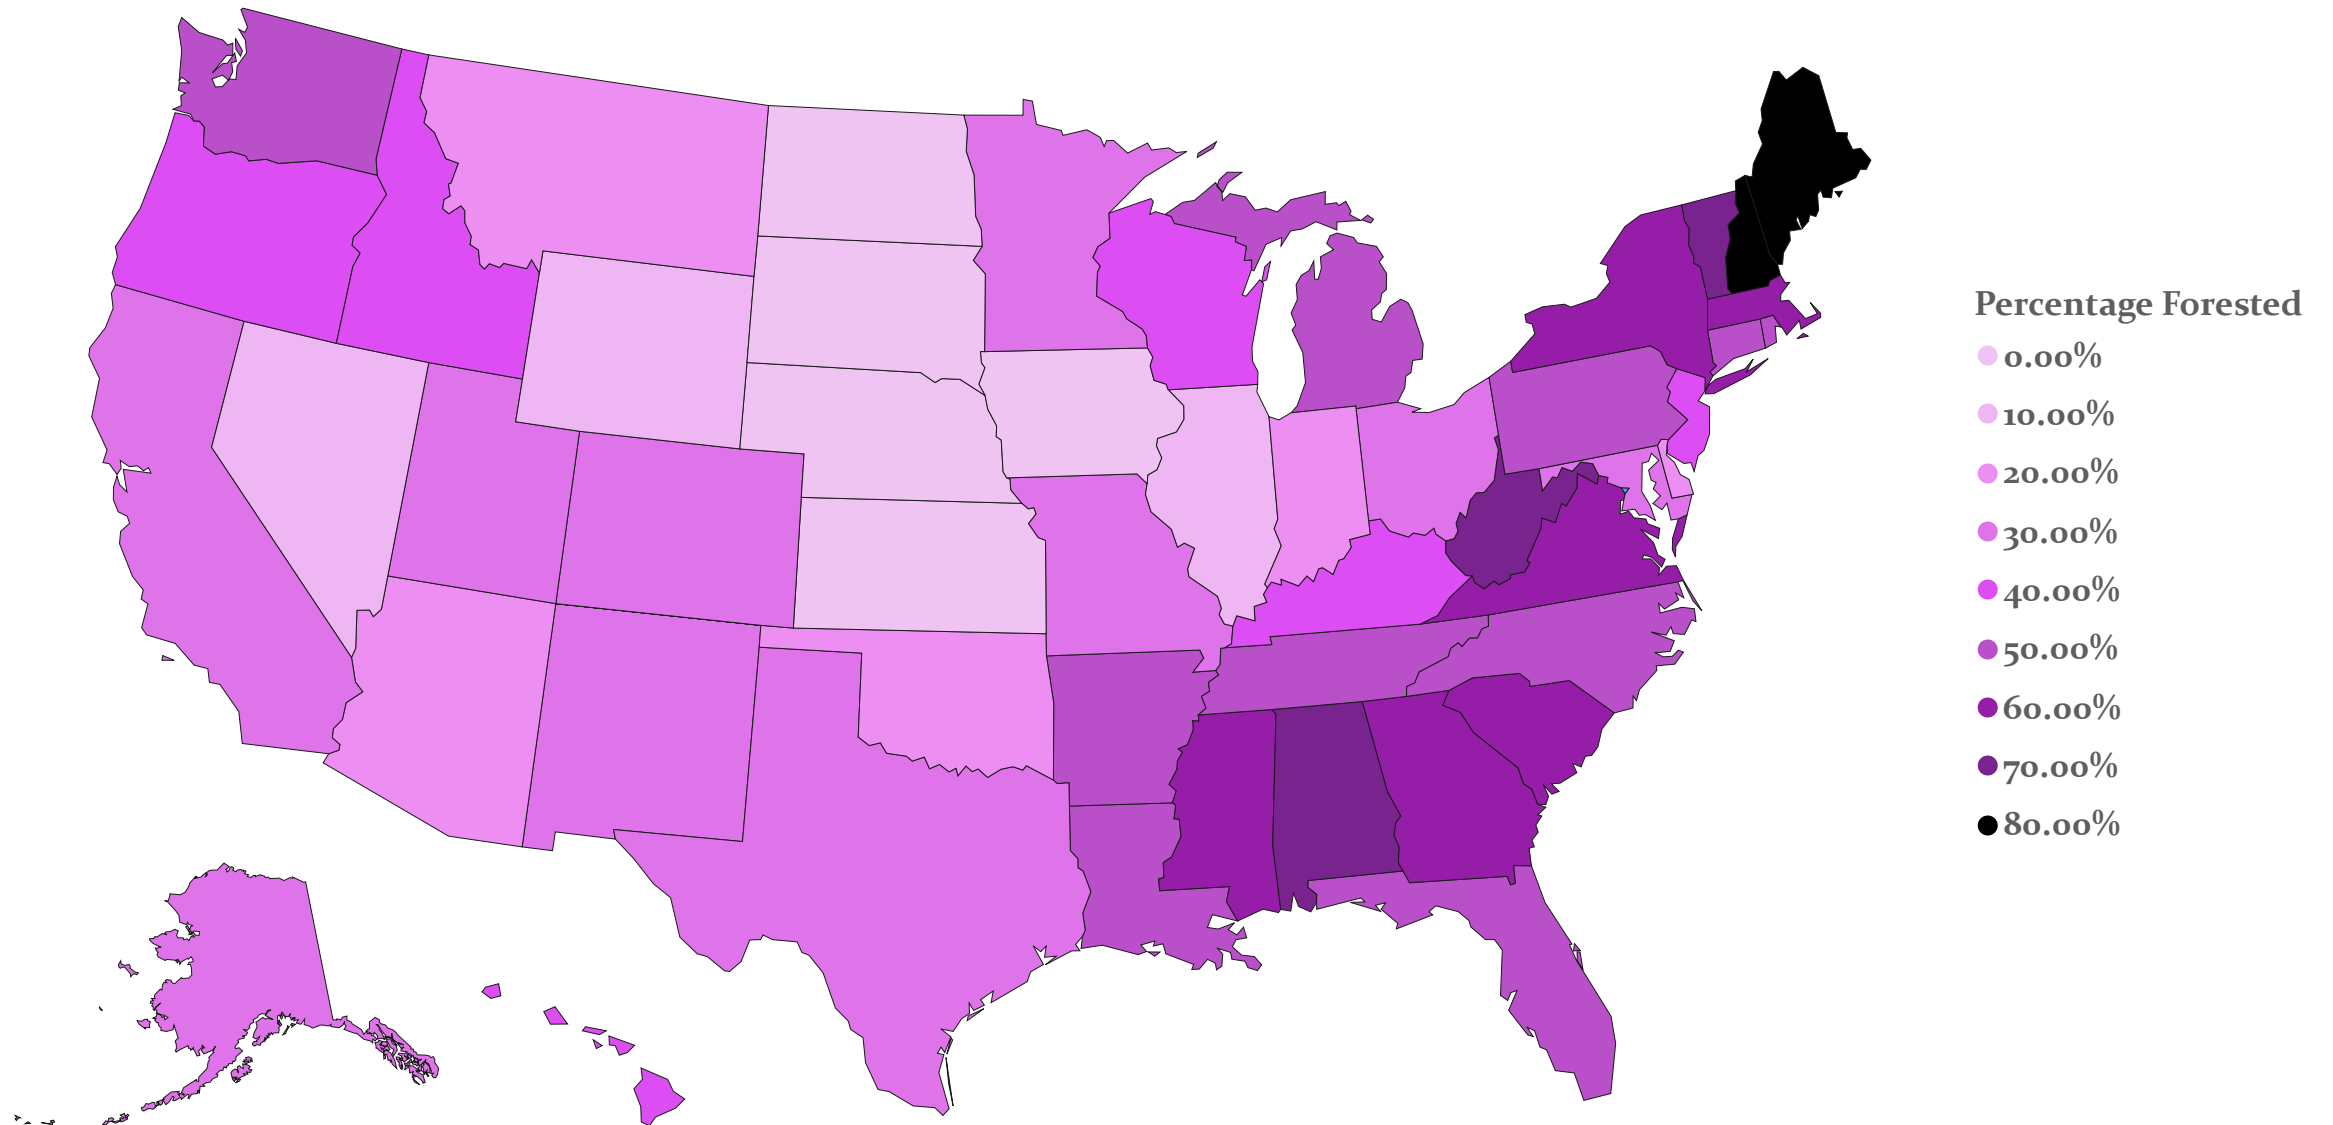

Acres

0M

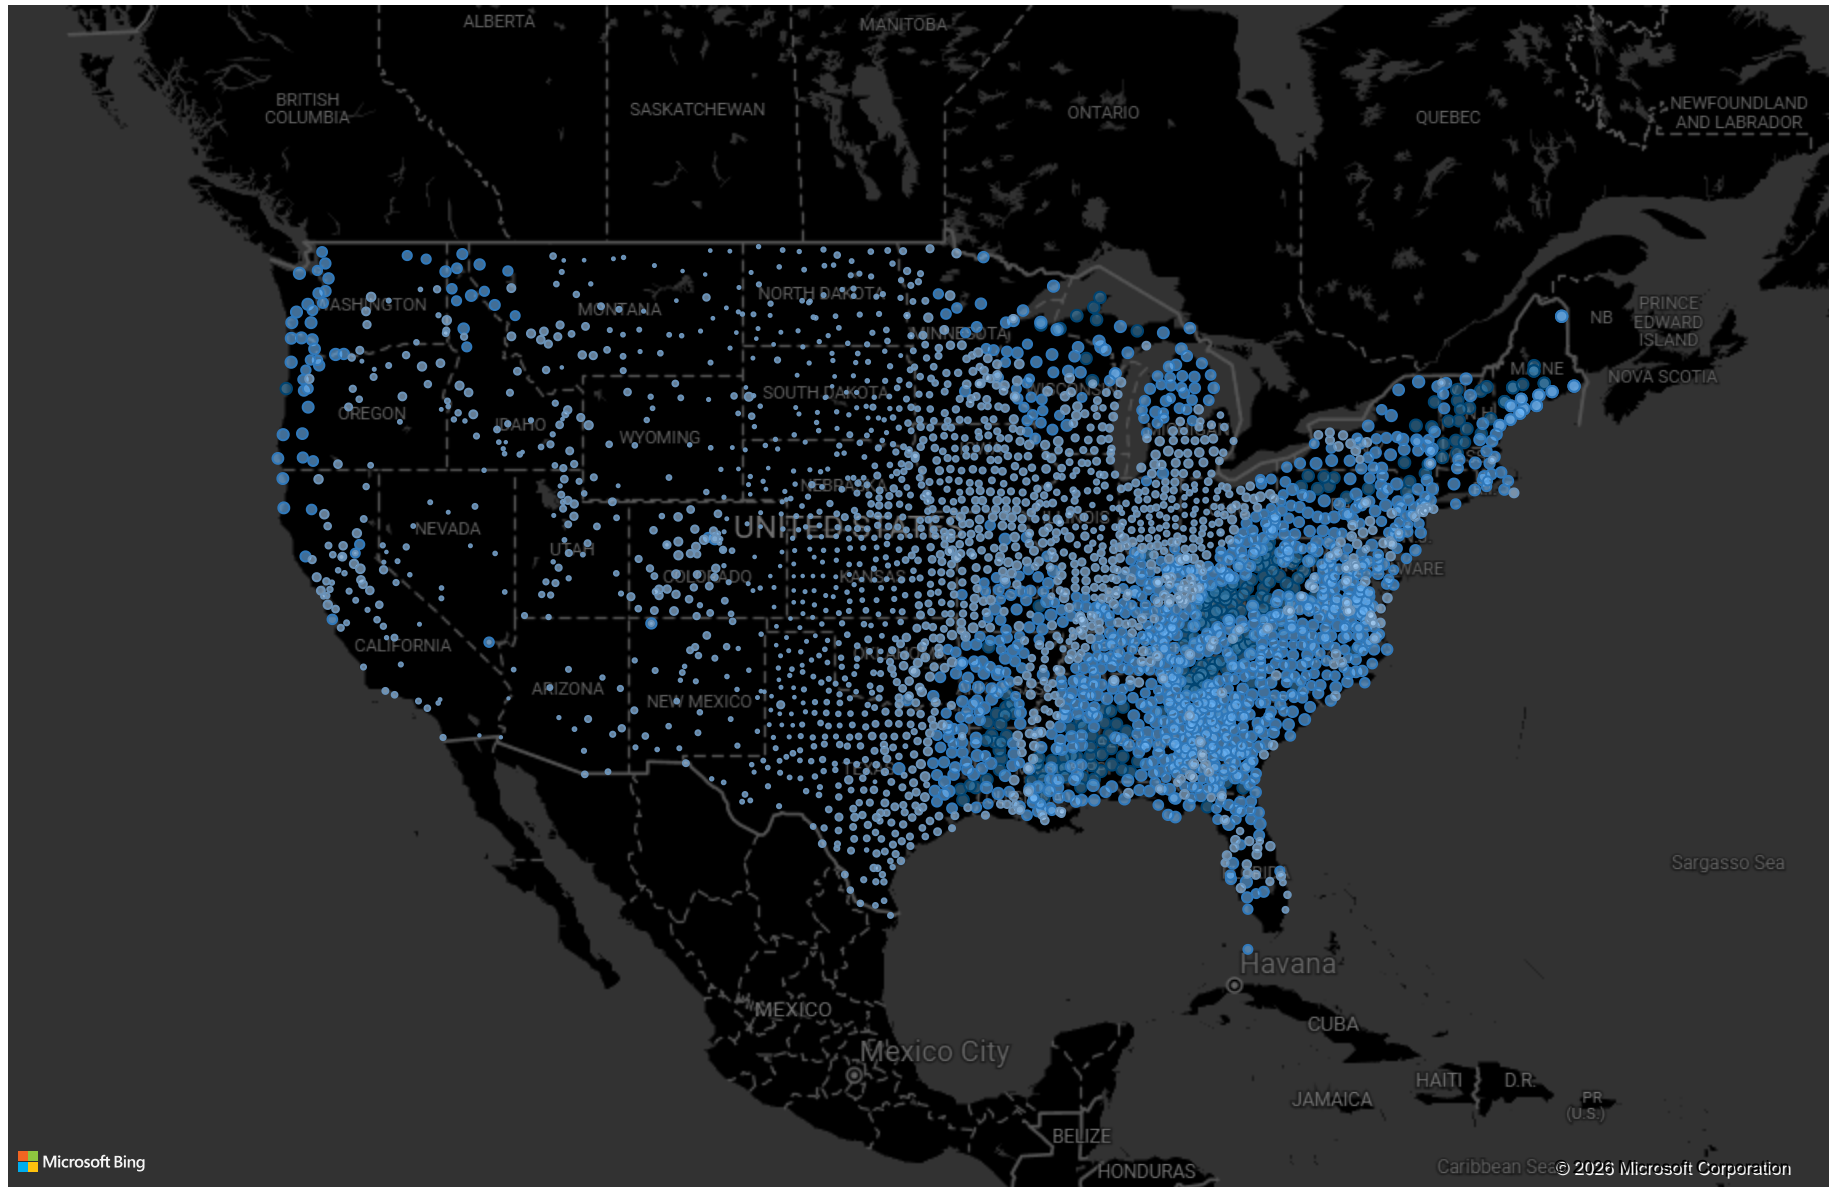

State

## Percent of Each State That is Forested

*Different from prior chart, since that was national parks, not all types of parks and private forests*

## County by % Forested

### Most Wooded Counties in the USA by % of Land

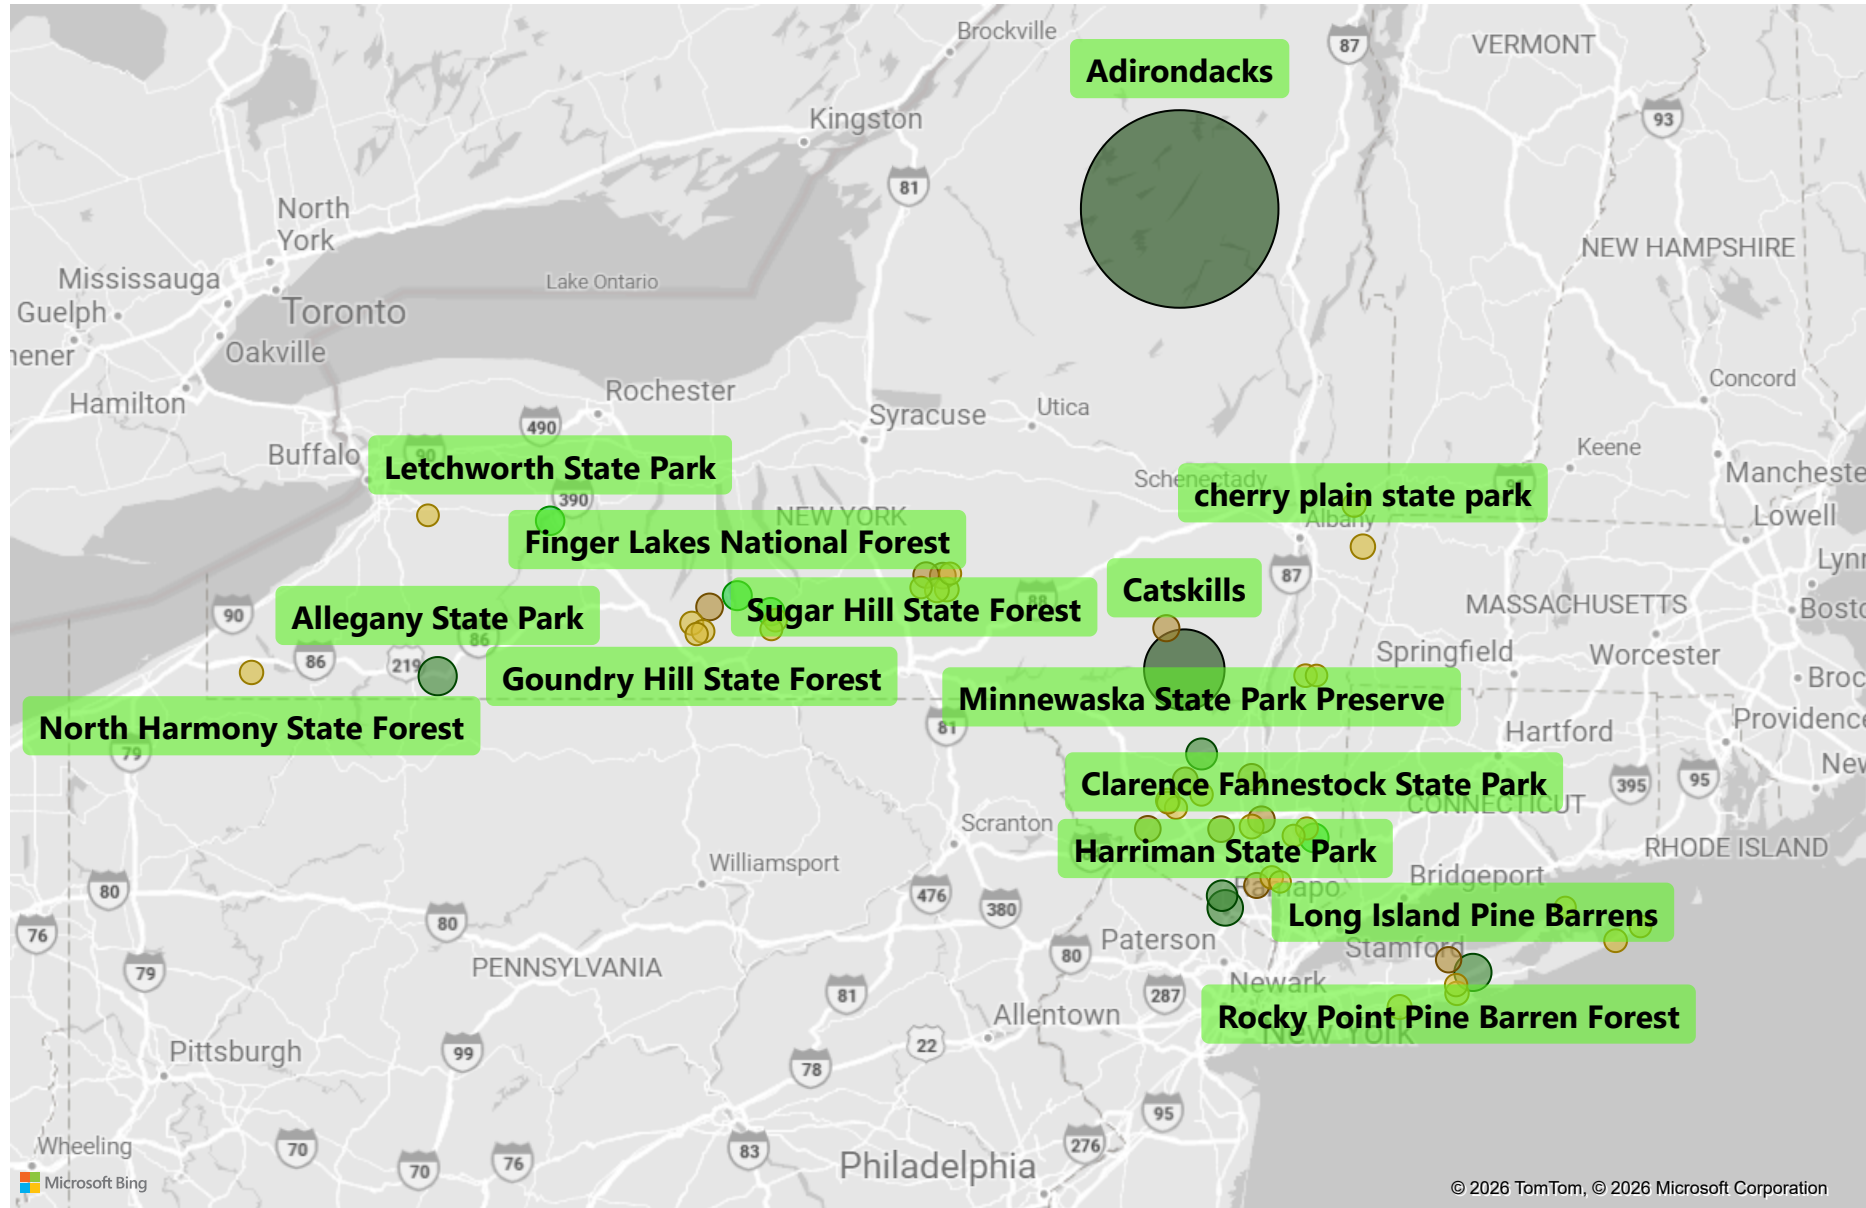

| Cty. State           | % Forest Cover |
|----------------------|----------------|
| Swain County, NC     | 83.72%         |
| Graham County, NC    | 81.97%         |
| Dallas County, AR    | 81.76%         |
| Leslie County, KY    | 81.54%         |
| Rabun County, GA     | 80.90%         |
| Webster County, WV   | 80.72%         |
| Winn Parish, LA      | 80.70%         |
| Cleveland County, AR | 80.51%         |
| Cameron County, PA   | 80.48%         |
| Harlan County, KY    | 80.36%         |
| Franklin County, MS  | 80.30%         |
| McDowell County, NC  | 80.01%         |

The results of this were surprising to me. I thought the most densely forested counties would be in the Pacific Northwest, but apparently they're in the Southeast / South-Central USA!

Source: US Fish and Wildlife Service. Data seems to conflict for some areas with other data

- ☐ Blue Mountain Reservation
- ☐ Bowman Lake State Park
- ☐ Briarcliff Peekskill Trailway
- ☐ California Hill State Forest
- ☐ Camp Hero State Park
- ☐ Catskills
- ☐ cherry plain state park
- ☐ Cinnamon Lake State Forest

Here is a snapshot of the model. It's pretty basic this time, but am including it for consistency. This report is more about rounding out the portfolio with different features of Desktop Power BI! More map and report features are available if you have a Power BI Service or business account.

sometimes it was a challenge to get a place to register on the map, hence the latitude/longitude in one table (or rewording county names a few different ways in another)

| Rank | State         | Percentage Forested | Latitude  | Longitude  | Percentage Forested (bins) | data_label_Attempt |
|------|---------------|---------------------|-----------|------------|----------------------------|--------------------|
| 1    | Maine         | 89.50%              | 45.253783 | -69.445469 | 80.00%                     | Maine: 0.8         |
| 2    | New Hampshire | 84.30%              | 43.193852 | -71.572395 | 80.00%                     | New Hampshire: 0.8 |
| 3    | West Virginia | 79.00%              | 38.597626 | -80.454903 | 70.00%                     | West Virginia: 0.7 |
| 4    | Vermont       | 77.80%              | 44.558803 | -72.577841 | 70.00%                     | Vermont: 0.7       |
| 5    | Alabama       | 70.60%              | 32.318231 | -86.902298 | 70.00%                     | Alabama: 0.7       |
